

Legal Aspects of Sustainable Building

Legally Green? Avoid the Pitfalls of Green Building Construction

Instructor: Ryan Yahne, Attorney, LEED® AP

As an architect, vendor, builder, or developer, you are committed to creating profitable green projects.

And, just as every party involved in a conventional construction project is vulnerable to risks associated with the project not going as planned, the same can hold true for parties to green building projects. Unsuspecting parties could face liability if expectations are not met, confusion arises as to the content of contract, or codes and regulations are not complied with.

Know how to anticipate unpleasant surprises before they arise—join Ryan as he shares strategies on how you can protect yourself.

His presentation will include an overview of recent case law and legislation dealing with sustainable building, tips for drafting contracts for contractors building sustainable homes and other structures, and real-world examples of specific claims being made in this area.

Avoid the Pitfalls and Find Out:

- Where are the big risks in green projects?
- What should you do to minimize those risks?
- What is the relevant law?
- Recent court cases
