

Information provided by

WOW! How can you get so much living space in such a compact three bedroom, two bathroom home? The answer is efficient use of space provided in 1370 sq. ft.

The living room with vaulted ceiling flows comfortably into the dining room giving a sense of spaciousness. The centrally located kitchen opens into the breakfast room and dining room. The covered deck is accessed through the dining room.

Right off the entry is a divided lite French door that allows this third bedroom to function as a home office as well.

A private bath serves the master bedroom which also features a his and hers closet arrangement. Put mirror paneled bi-fold doors to create a dressing room feel. The traditional exterior masks a very modern floor plan ideally suited for the growing family and can be built on your land or ours.
